HARSHAD SHINDE

Python Full Stack Developer | Backend Engineer

Pune, Maharashtra | +91 8010159015 | hshinde2405@gmail.com | LinkedIn | GitHub

PROFILE

Python Full Stack Developer with ~2 years of hands-on experience (including internship) building enterprise web applications with Django, Django REST Framework, Vue.js and PostgreSQL. Built production-style AI systems using RAG, hybrid search and LLM APIs, including a retrieval evaluation pipeline measuring Recall@K, MRR and NDCG. Author of 3 peer-reviewed research papers in healthcare AI, medication recommendation and AI-assisted creativity, plus a registered copyright. Seeking a Backend / Full Stack / AI Engineer role.

TECHNICAL SKILLS

- **Languages:** Python, Java, JavaScript, TypeScript, SQL
- **Backend:** Django, Django REST Framework, FastAPI, Flask, Spring Boot, REST API design
- **Frontend:** Vue.js, React, Next.js, HTML5, CSS3, Bootstrap
- **Databases:** PostgreSQL, pgvector, MySQL, Redis
- **AI / LLM:** RAG, LangChain, Vector & Hybrid Search, Reranking, Prompt Engineering, Groq API, OpenAI API, scikit-learn
- **Tools & Practices:** Git, GitHub, Supabase, Vercel, Agile/Scrum, Query Optimization, Code Review

EMPLOYMENT HISTORY

Python Full Stack Developer

KodSquad Technologies Pvt. Ltd. | Jan 2026 – Aug 2026

- Built modules of an enterprise case management platform using Python, Django and Django REST Framework.
- Designed a dynamic questionnaire engine with conditional logic and mapping resolution.
- Developed RESTful APIs with request validation and structured exception handling, integrated with a Vue.js frontend.
- Optimized PostgreSQL queries and ORM operations; resolved production issues and performed code reviews in an Agile team.

Java Full Stack Intern

Archer Infotech | Aug 2024 – Nov 2025

- Developed backend services and REST APIs using Java and Spring Boot.
- Used Git branching and pull-request workflows; tested and debugged features across the full development lifecycle.

KEY PROJECTS

Enterprise AI Knowledge & Operations Copilot

GitHub

Python, FastAPI, PostgreSQL, pgvector, LangChain, RAG, Groq API, Redis, Next.js, TypeScript

- Built a RAG assistant with hybrid (keyword + vector) search, reranking and query rewriting that returns answers with source citations.
- Created an automated evaluation pipeline tracking retrieval accuracy (Recall@K, Precision@K, MRR, NDCG) and answer quality (faithfulness, relevance, citation correctness).

AI Resume Analyzer & Career Optimization Platform

GitHub

Next.js, React, Supabase, PostgreSQL, Groq API, REST APIs

- Built an ATS-focused analyzer that detects keyword gaps against a job description and generates tailored improvement suggestions.
- Added resume-based mock interview questions and career coaching using structured LLM prompts.

AI-Driven Healthcare Diagnosis & Treatment System

GitHub

Python, Flask, MySQL, Machine Learning, REST APIs

- Built a disease prediction system with data preprocessing, feature engineering and model evaluation.
- Compared Random Forest and SVM classifiers; served real-time predictions through REST APIs.

EDUCATION

B.E. in Artificial Intelligence and Data Science

Dr. D. Y. Patil College, Talegaon, Pune | 2021 – 2025

- CGPA: 7.71 / 10 | Coursework: Machine Learning, Deep Learning, Data Science, Big Data Analytics, Software Development
